Business, supporting transitions and entrepreneurship

With its campuses in Brest, Rennes and Nantes, IMT Atlantique contributes to the regional and national economy by creating jobs, particularly through entrepreneurship training, and by identifying and supporting the creation of innovative companies.

Our university accompanies businesses in their digital, industrial and energy transitions. IMT Atlantique is committed to helping its industrial partners respond to major recruitment challenges – thanks to our young graduates, apprentices or trainees – and to providing innovation through scientific and technological expertise – thanks to our industrial or teaching consortiums, research themes, and business incubators. Through the Fondation Mines-Télécom, IMT Atlantique benefits from the generosity of industrial patronage and the community of its graduates to support its equal opportunities and innovation activities.
